INTRODUCTION TO THE COURSE

Flutter is the UI (user interface) toolkit of Google for creating outstanding and indigenously collected apps for web, mobile, desktop, as well as embedded gadgets from just one codebase. Put simply, Flutter is an open-source user interface software development kit (SDK) made by Google that is applied for building cross-platform apps for iOS, Android, Mac, Linux, Google Fuchsia, and the World Wide Web just from one code base. Written in C, Dart, and C++, Flutter has significant applications on both Android and iOS platforms for creating high-performance apps. Developers prefer to use it for building their dream apps for Android and iOS. This is the reason why there is increasing demand for Certified Android Application Developer with Flutter lexperts in the IT sector.

This is a popular web development course in which the students receive training on the basics of performing Android application development with Flutter. An Android developer with Flutter utilizes the Dart programming language to create apps for the Android OS platform.

FOCUS AREAS

- HIGH PERFORMANCE
- NATURAL
- WIDGETS
- MACHINE CODE

This state-of-the-art app development course tailored by IEM Labs will take the students into the core of the subject in a step-by-step way so that all the students can understand the topics without much difficulty. After the completion of this advanced web development training course, the students will be adequately skilled to develop Android apps with Flutter and launch them in the app market, courtesy of Google PlayStore.

Our Android application development with Flutter professionals will carry out the whole training session. All of them are reputed for their voluminous experience in this area. After achieving this certification, students can send their CVs for Android application developers with Flutter and other comparable job openings.

IEMLabs follows practical-based training processes to educate its students. Therefore, this web development course is substantially rewarding as IEMLabs constantly provides practical exposure in all the projects handled by the students. The entire syllabus of the training program consists of practical-based classes for aiding the students.

ABOUT THE COURSE

- **Course Type: Basic**

- **Eligibility Criteria:**

   → No basic knowledge is required.

   →Minimum System Configuration Required: -

     o Intel i5 Processor

     o 8GB RAM

     o 1TB Hard Disk

- **Batch Size:** 5 students maximum
- **Course Duration:** 40 hours

	ONLINE	OFFLINE
COURSE FEE:	12000 INR	12000 INR
TRAINING LOCATION:	ANY	KOLKATA

COURSE CONTENT

|	
MODULE 01	**DART Programming Fundamentals**
MODULE 02	**Flutter Basics**
MODULE 03	**Running App on different devices**
MODULE 04	**Widgets styling addling logic**
MODULE 05	**Responsive and adaptive interface**
MODULE 06	**Widget and flutter internals**
MODULE 07	**Navigation and multiple screens**
MODULE 08	**State management**
MODULE 09	**Firebase image upload ad push notifications**
MODULE 10	**Using native device features**
MODULE 11	**Project**
