Introduction to the Course

Ethical Hacking is something we hear in increasing frequency nowadays. With the development of technology, data breach and hacking are the most common terms we hear today. An Ethical Hacker is a person who penetrates a network to check for vulnerabilities.

This type of service provided by Ethical Hackers is known as Vulnerability Assessment & Penetration Testing I VAPT services. In our ethical hacker training program, the student will be trained by field professionals who have been working as Ethical Hackers/Cyber Security Analysts for the last 8 -10 years. In the last few years, the security of a software product has increased by almost ten-fold.

Being an Ethical Hacker/Cyber Security Analyst, the student can get jobs in many prestigious MNCs as a Security Analyst who points out all the vulnerabilities in the infrastructure and finds solutions to resolve them. In this certified ethical hacking course, you will be trained in various methods of hacking into a system.

FOCUS AREAS

● Network Security 

 Web Application Security ●

● Android Application Security 

 Cyber Forensic ●

What makes this ethical hacker training course much more exciting is that we provide hands-on training procedures through projects and practical-based classes throughout the entire curriculum of the course.

We at IEMLabS provide both Online (through platforms like "Google Hangouts Meet" , "Go to Meeting", "Zoom", etc) and Offline mode classes, The most beneficial point for a student to get trained by IEMLabs is "One Year Lab Access", i.e. every student from the date of admission will have access to our "Online Virtual Lab" for practicing and getting all notes, pre-recorded videos, and tools according to their course for one year free of cost.
