

CERTIFIED FULL STACK WEB DEVELOPER

CWD

COURSE
BROCHURE

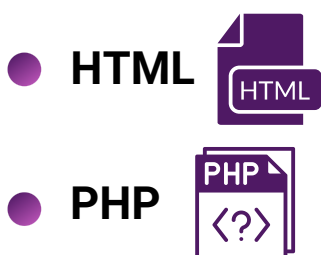

INTRODUCTION TO THE COURSE

A Full Stack, Web Developer means someone who develops both the front-end and the back-end of a website. Full Stack Web Developers are in very high demand in many of the multinational companies that we see. The website of any company can be considered as the face of any company, so it is the caliber of the developer to build an optimised website.

In this web development course, the students will be taught the fundamentals of Web Development from scratch which will help the students gain qualitative knowledge and competitive advantage to work on these areas in real life. At the end of this course, students will be able to do both front-end and back-end developments for any fully functional website. Training will be given by industry professionals, who are working in this field for several years.

After the completion of this web development course, students will be able to apply for any job roles related to Web Development to any company including MNCs.

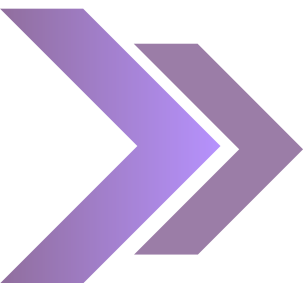

FOCUS AREAS

This Certified Full Stack Web Developer course by IEM Labs adds value to learning web development since we arrange hands-on training methodologies in all the projects and classes for the entire duration of the course.

Both online and offline class facilities are available with IEM Labs. The online classes are quite enlightening and motivating due to the application of interactive and educative platforms like Go to Meeting, Google Hangout, and Zoom. The most advantageous part for a student to get taught by IEM Labs is the free 12-month lab access. All the students will have online virtual lab facilities from the admission date and can practice everything they have learned. They will be given all notes and study materials, pre-recorded videos, and other academic tools as necessitated by their courses for 12 months free of cost.
